Projects

Sync Board   ⓞ repo
- Developed a real-time collaborative whiteboard, enabling multiple users to draw, annotate, and edit simultaneously.
- Implemented presence, storage, and live cursors features via Liveblocks for smooth, low-latency collaboration.
- Built serverless backend logic with Convex to handle data synchronization, and secure storage of board states.

Sticky Tasks   ⓞ repo
- Developed a single-page CRUD app for task management.
- Implemented authentication, validation, filtering, and searching.
- Built using plain JavaScript to showcase foundational skills.

Cash Tracker   ⓞ repo
- Developed a React-based SPA for tracking personal finances.
- Created detailed statistics (pie and line charts) and categorization.
- Includes validation and authentication.
